workers' rights , defend, economy, producer, work

ABSTRACT

In your opinion, other than not paying the workers, how can we serve them? It is a question that a factory manager or head asks his colleagues. Every country's economy depends on 2 things: export, tax When the producer is under pressure, he does not think it is advisable to produce more, and when the factors that hinder the work are more than the factors that help the work, as a result, it is natural that the work stops and there is no growth. As a result, when the export option disappears, the tax option remains, the amount of which increases and makes the poor class weaker and the middle class weaker. In the meantime, workers are the most vulnerable sections of society, and decision-making powers must think and find a way to harm workers.

1. Introduction

You can't do anything anyway, you have to work even if it's bad! One of the things that should not be done for workers is to give them a podium.

We should give the podium to these actors who sit in front of Mehran Modiri and say that after working in the mine, acting is the hardest job in the world?!!!! So far, we have seen that it is possible not to give the workers a platform in addition to their salaries Hitting a worker is actually a self-inflicted injury, but we think we are very smart And by not paying workers' salaries, we add to our wealth, and what's more, if the people are less and more are added to us, never mind the collective profit, never mind the export.

If we care about workers, we will become a country like Japan Instead of thinking about expanding our product range and hiring new workers, we should think about how to make more money with less production. Let's send the talks of the experts to our garbage bins and work hand in hand to destroy the country. What kind of conjugation is important to the worker? Yes, I know, the masculine singular conjugation is absent. Well, now that it is absent, then you can say anything behind them.

2. Previous Work

Reza Mohammadian conducted research regarding the defense of workers' rights [1]. Through the efforts of Gholamhassan Moslemi, studies were also carried out concerning the defense of workers' rights, their relationship with the Court of Administrative Justice, the status of labor organizations within Iran's public legal system, and an analysis of the legal and employment status of workers in arduous occupations [2, 3].

Shirin Habibian presented research in 1404 analyzing the legal and employment status of workers in arduous occupations [4]. Amir Torbati Golmohammadian presented research regarding the rights and obligations of workers and employers [5].

Vali Jeddi conducted research in 1404 on the necessity of managerial attention to workers' rights in addressing living and family expenses [6]. Hassan Movaseghi presented an article in 1405 regarding the evolution and advancement of workers' rights [7].

Nematollah Radi conducted research in 1404 examining the impact of labor laws on the rights of workers and employers in Iran [8].

Forough Zohrabzadeh and Mahboubeh Abdollahi conducted research in 1404 regarding workers' job security under Iranian law [9]. Amir Hassan Rezaei presented research in 1403 concerning labor law and worker protection in the global economy [10].

Farshid Jafari conducted research in 1404 regarding the protection of workers' rights during the process of divesting state-owned companies [11].

In 1405, Masih Aslani conducted research examining the music industry and its relationship with temperaments and constellations [12-19]. In 1405, Daniel Bikas presented research concerning art and industry [20]. In 1405, Fatemeh Etemadi-Rad analyzed research regarding art and tourism [21-22]. In 1400, Mohsen Poursheikhi examined research related to itinerant vendors and goods production [23-24]. In 1399, Batul Shahriyar investigated topics concerning workers' occupations, frost damage, and plant growth [25-26]. With the assistance of Reza Kakoulvand, research was conducted in 1401 on towers and their performance under various conditions [27-37].

3. Result and discussion

They say factory workers are very busy, they even ask for time to go to the bathroom, eat or pray, what a lot of expectations! What's going on, doesn't being a worker mean being a slave? You look at people as if we are in the 21st century!

If you are against us, we will fight you, we understand the workers better than you Because if you pay them their salaries, they will be rich! We reduce their salaries just for their own sake, just so they don't get rich! Because the increase is not good at all.

(Yes, we think about them so much, we even think about them) Paying attention to the worker and his rights will make the workers feel safe and their number will not decrease and may even increase, and this will lead to more and maybe better production, and better production and more exports will follow. The capital returns to the country (of course, there are exceptions in this regard).
